The mention of Buddhism in Indonesia calls to mind for many people the Central Javanese monument of Borobudur, one of the largest Buddhist monuments in the world and the subject of extensive scholarly scrutiny. The neglect of scholarship on Buddhist art from later periods might lead one to assume that after the tenth century Buddhism had been completely eclipsed by the predominantly Hindu Eastern Javanese dynasties. Yet, as the works discussed here illustrate, extraordinary Buddhist images were still being produced as late as the fourteenth century. Violence and Serenity offers a close examination of some of the impressive works from East Java and Sumatra and explores their political and religious roles. The number of clearly identifiable Buddhist works from the Singasari and Majapahit dynasties (1222–ca. 1520) is limited, yet existing examples are impressive. They demonstrate a remarkable level of craftsmanship and are exceptionally expressive, exhibiting a range of emotions from the ferocious to the serene. Following a brief discussion of the early history of Buddhism in Indonesia, Natasha Reichle focuses each chapter on a specific statue or group of statues and considers the larger issues evoked by the images. Through a rarely examined depiction of the last Singasari king, she explores the nature of religion in Java in the late thirteenth century and what we know about tantric practices and the syncretism of Hinduism and Buddhism. She reassesses the question of portraiture in ancient Javanese art while contemplating the famous Prajñāpāramitā from Singasari. Notions of kingship are discussed in light of a number of statues depicting the Buddhist deity Amoghapāsa and his attendants and the meanings of the Amoghapāsā maṇḍala. The final chapter examines the origins and significance of one of Indonesia’s most spectacular sculptures, a four-meter-high Buddhist bhairava (demon) discovered in West Sumatra.

Recent atrocities have ensured that terrorism and how to deal with terrorists legally and politically has been the subject of much discussion and debate on the international stage. This book presents a study of changes in the legal treatment of those perpetrating crimes of a political character over several decades. It most centrally deals with the political offence exception and how it has changed. The book looks at this change from an international perspective with a particular focus on the United States. Interdisciplinary in approach, it examines the fields of terrorism and political crime from legal, political science and criminological perspectives. It will be of interest to a broad range of academics and researchers, as well as to policymakers involved in creating new anti-terrorist policies.

This book is the fifth in a planned series of books that examine key topics (e.g., learner modeling, instructional strategies, authoring, domain modeling, assessment, impact on learning, team tutoring, machine learning, and potential standards) in intelligent tutoring system (ITS) design through the lens of the Generalized Intelligent Framework for Tutoring (GIFT) (Sottileare, Brawner, Goldberg & Holden, 2012; Sottileare, Brawner, Sinatra, & Johnston, 2017). GIFT is a modular, service-oriented architecture created to reduce the cost and skill required to author ITSs, manage instruction within ITSs, and evaluate the effect of ITS technologies on learning, performance, retention, transfer of skills, and other instructional outcomes. Along with this volume, the first four books in this series, Learner Modeling (ISBN 978-0-9893923-0-3), Instructional Management (ISBN 978-0-9893923-2-7), Authoring Tools (ISBN 978-0-9893923-6-5) and Domain Modeling (978-0-9893923-9-6) are freely available at
Until very recently, pragmatics has been restricted to the analysis of contemporary spoken language while historical linguistics has studied historical texts and language change in a decontextualized way. This has now radically changed and scholars from around the world are trying to build a new theoretical framework that integrates recent advances both in pragmatics and in historical linguistics. The volume, which contains 22 original articles, starts with an introduction that is both a state-of-the-art account of historical pragmatics and a programmatic statement of its future potential and its different subfields. Part I contains seven pragmaphilological papers that deal with historical texts and their interpretations by paying close attention to the communicative context of these texts. The second and third parts comprise papers in diachronic pragmatics. The ten papers of part II take a linguistic form as their starting point, e.g. particular lexical items or syntactic constructions, and study their pragmatics at different times (diachronic form-to-function mappings), while the four papers of part III take a particular pragmatic function as their starting point, e.g. discourse strategies or politeness, and study their linguistic realisation at different times (diachronic function-to-form mappings).

Design Recommendations for Intelligent Tutoring Systems (ITSs) explores the impact of intelligent tutoring system design on education and training. Specifically, this volume examines “Authoring Tools and Expert Modeling Techniques”. The “Design Recommendations book series examines tools and methods to reduce the time and skills required to develop Intelligent Tutoring Systems with the goal of improving the Generalized Intelligent Framework for Tutoring (GIFT). GIFT is a modular, service-oriented architecture developed to capture simplified authoring techniques, promote reuse and standardization of ITSs along with automated instructional techniques and effectiveness evaluation capabilities for adaptive tutoring tools and methods.

In today’s hyper-transparent world, consumers have enormous power to decide which brands are worth their time and money—so how do you make sure they choose yours? Unfortunately, most leaders and organizations are stuck following archaic, detrimental business practices. Meanwhile, savvy consumers and employees across every generation are making their stance perfectly clear: They are not interested in supporting organizations that seem inauthentic, soulless, or untrustworthy. In this environment, only the honest will survive. In Honest to Greatness, serial Inc. 5000 entrepreneur Peter Kozodoy shows how today’s greatest business leaders use honesty—not as a touchy-feely core value, but as a business strategy that produces game-changing, industry-dominating success. Through case studies and interviews with leaders at Bridgewater Associates, Sprint, Quicken Loans, Domino’s, The Ritz Carlton, and more, Kozodoy presents fresh business concepts that anyone in the workplace can implement in order to: • Reach, engage, and retain your best customers • Attract and inspire the best talent in any industry • Create an unbeatable culture of innovation that dominates your competitors • Earn your team’s respect and loyalty • Unlock deep personal fulfillment by setting the “right” goals Filled with powerful lessons for current and future leaders, this timely book demonstrates how to use honesty at both the organizational and individual level to achieve true greatness in business and in life.

Robert Lehman, one of the foremost art collectors of his generation, embraced traditional and modern masters. This work catalogues 130 nineteenth- and 20th-century paintings that are part of the Robert Lehman Collection at the Metropolitan Museum. It includes paintings by Ingres, Theodore Rousseau, and Corot among other early 19th-century artists. In addition to a group of early German drawings, this collection includes a Saint Paul from a series associated with Jan van Eyck and the famous Scupstoel from the circle of Rogier van der Weyden. It discusses all drawings, placing each in its art historical setting and complementing it with comparative illustrations of related works.

This practical guide is devoted to vascular diseases as dealt with by vascular surgeons. It is written with the collaboration of other specialists attending to vascular diseases. The book provides a concise overview of the current level and standards of care of vascular diseases in the European Union, and fills the need of vascular specialists who prepare for the U.E.M.S. exam. The text is well-structured and contains practical guidelines. The readership that will benefit most will be trainees and practitioners in vascular surgery, angiology and also practicing physicians. However, the book will also be valuable to physicians of other specialties.

Abandon the networking-for-networking's-sake mentality in favor of a more powerful and effective approach to creating and enhancing connections. STOP NETWORKING. Seriously, stop doing it. Now. It is time to ditch the old networking-for-networking's-sake mentality in favor of a more powerful and effective approach to creating and enhancing connections. In Superconnector, Scott Gerber and Ryan Paugh reveal a new category of professionals born out of the social media era: highly valuable community-builders who make things happen through their keen understanding and utilization of social capital. Superconnectors understand the power of relationship-building, problem-solve by connecting the dots at high levels, and purposefully cause different worlds and communities to interact with the intention of creating mutual value. How can you become a Superconnector? Gerber and Paugh share instructive anecdotes from a who’s who roster of high achievers, revealing how to systematically manage a professional community and maximize its value. Of utmost importance is practicing Habitual Generosity, acting on the knowledge that your greatest returns come when you least expect them, and that by putting others' needs first the good karma will flow back to you tenfold. Gerber and Paugh also explore winning strategies such as The Art of Selectivity, a well-honed ability to define which relationships matter most for you and decide how you will maintain them over time. Full of helpful advice on how to communicate with
anyone about anything, Google-proof your reputation, and much more, Superconnector is a must-read for those seeking personal and business success.

e-Learning Ecologies explores transformations in the patterns of pedagogy that accompany e-learning—the use of computing devices that mediate or supplement the relationships between learners and teachers—to present and assess learnable content, to provide spaces where students do their work, and to mediate peer-to-peer interactions. Written by the members of the "new learning" research group, this textbook suggests that e-learning ecologies may play a key part in shifting the systems of modern education, even as technology itself is pedagogically neutral. The chapters in this book aim to create an analytical framework with which to differentiate those aspects of educational technology that reproduce old pedagogical relations from those that are genuinely innovative and generative of new kinds of learning. Featuring case studies from elementary schools, colleges, and universities on the practicalities of new learning environments, e-Learning Ecologies elucidates the role of new technologies of knowledge representation and communication in bringing about change to educational institutions.
