This book provides a broad overview of the ways in which 'adventurous practices' influence, and are influenced by, the world around them. The concept of adventure is one that is too often tackled within subject silos of philosophy, education, tourism, or leisure. While much of the analysis is strong, there is little cross-pollination between disciplines. *Adventure & Society* pulls together the threads of these discourses into one coherent treatment of the term

' adventure ' and the role that it plays in human social life of the 21st century. It explores how these practices can be considered more deeply through theoretical discourses of capitalism, identity construction, technology and social media, risk-taking, personal development, equalities, and sustainability. As such, the book speaks to a broad audience of undergraduate and postgraduate students across diverse subject areas, and aims to be an accessible starting point for deeper inquiry.

A collection of poems and stories inspired by wild spaces and endurance running. Shifting the narrative from the tired trope centering around the white man conquering a gritty race or mountain, Run Wild & Be explores the female

experience embracing freedom and self love through her time spent running long outside. Drawing inspiration from a 4000 mile run across the United States, this book weaves readers through tiny mountain towns, into the desert, and sprawling metropolises, while noting gender inequities, power imbalances, changing goals, and morphing identities.

All around the world and throughout history, resistance has played an important role - and it still does. Some strive to raise it to cause change. Some dare not to speak of it. Some try to smother it to keep a status quo. The contributions to this volume explore phenomena of resistance in a range of historical and contemporary environments. In so doing, they not only contribute to shaping a comparative view on

subjects, representations, and contexts of resistance, but also open up a theoretical dialogue on terms and concepts of resistance both in and across different disciplines. With contributions by Micha Brumlik, Peter McLaren, and others.
