GM Manual Transmission Identification - Part Three

Manual Transmission Identification: As mentioned above, modern 5-speed and 6-speed manual transmissions are easy to identify, but older 4-speed transmissions have more variety. While there are no distinctive pans and bolt counts to make transmission identification simple, 4-speed manual transmissions can be generally identified by examining the side profile.

GM Transmission Identification - Classic Industries

Popular Automatic Transmission Identification Chart

The NV3500 stands for New Venture Gear 3500. It is a 5 speed manual transmission. The transmission was developed through a joint deal by General motors and Chrysler. It entered production in 1993.

NV3500 Specs + Identification | Drivetrain Resource

You ' ll find the casting numbers on the main transmission case just after the tail shaft housing. The first letter in this number is going to tell you exactly which Saginaw transmission you have. You are looking of the letter R.

Saginaw 4 Speed Transmission ID | Drivetrain Resource

Many transmissions over the years have been rebuilt or replaced, upgraded from a 3-speed to a 4-speed etc. which can make identification somewhat difficult at times. Shown below are some diagrams that will describe where the serial number is stamped on all transmission cases. The 9-digit code will tell you which division, year, model, assembly plant, and car the transmission was pulled from.

Muncie Transmission Identification

Identification begins by visually identifying the units as Saginaw, Muncie or Borg Warner models and then by differentiating the three Muncie units visually and by decoding the serial number. Step 1 Inspect the transmission.

How to Identify Chevy 4 Speed Transmissions | It Still Runs

General Motors Transmission Guide, Specs, Info | GM Authority

General Chevrolet Transmission Identification Transmissions are marked and identified by: - Casting numbers on the case, extention housing and side cover (on manual trans). - Date Casting Codes - Assembly Date Code Stamping - can be stamped anywhere... - Chassis Vin Number stamping - beginning in 1962 Transmissions have RPO numbers, usually beginning with "M".

Chevrolet Chevy Transmission Identification and Decoding

The T-56 six speed manual transmission has been used in a wide range of vehicles from General Motors, Dodge, and Ford Motor Company. The transmission was originally designed and built by BorgWarner for the Dodge Viper later being used by GM in 1992 for the generation II and later engines, but from 1998 was built by Tremec, though nothing changed internally. The T-56 has been succeeded by the Tremec TR-6060 transmission in many former T-56 applications, as well as applications requiring greater s
