What is Metacognition | Explained in 2 min Metacognitive \"0026 CBT Tools to Address Anxiety \"0026 Depression

Rich in theoretical models and empirical data, the International Handbook of Metacognition and Learning Technologies synthesizes current research on this critical topic. This interdisciplinary reference delves deeply into component processes of self-regulated learning (SRL), examining theories and models of metacognition, empirical issues in the study of SRL, and the expanding role of educational technologies in helping students learn.

International Handbook of Metacognition and Learning ...
International Handbook of Metacognition and Learning Technologies. Exhaustive offering of global research in the field, including cognitive and learning sciences to AI to educational technology. Only publication integrating all aspects of the fields of metacognition and learning technologies. Provides comprehensive overview of learning technologies used to study and foster students’ metacognitive learning.

For each technology covered, the Handbook: Explains how the technology fosters students' metacognitive or self-regulated learning. Identifies features designed to study or support metacognitive/SRL behaviors. Reviews how its specific theory or model addresses learners’ metacognitive/SRL processes. Provides detailed findings on its effectiveness toward learning. Discusses its implications for the design of metacognitive tools. Examines any theoretical, instructional, or other challenges. These ...

The difference between cognition and metacognition is another important theoretical distinction. Metacognition can be broadly defined as cognition about one's own cognitive processes (Flavell, 1979; Baker, 2002). Most definitions of metacognition have focused on two separate but related aspects: (1) knowledge/awareness of cognitive processes, and

Metacognitive skills pertain to the acquired repertoire of procedural knowledge for monitoring and controlling one’s cognitive processes (Veenman, 2011). Halpern (1998) emphasizes the role of metacognitive planning, monitoring, and evaluation activities in critical thinking (CT).
