PEX-02-01 - Physio Ex 9.1 -

BIOL 3120 - UHD - StuDocu

Skeletal muscle fibers are multinucleate cells that are long and thin. A motor unit is a unit that is a combination of a motor neuron and all of its connections with muscle cells. A skeletal muscle twitch is a contraction of an entire muscle. An electrical stimulus is an electrical impulse from the nervous system that tells the muscle to contract.

PhysioEx™ 9.0: Laboratory Simulations in Physiology with 9.1 Update is an easy-to-use laboratory simulation software and lab manual that consists of 12 exercises containing 63 physiology lab activities that can be used to supplement or substitute wet labs. PhysioEx allows students to repeat labs as often as they like, perform experiments without harming live animals, and conduct experiments that are difficult to perform in a wet lab environment because of time, cost, or safety concerns.

Exercise 2: Skeletal Muscle Physiology: Activity 2: The Effect of Stimulus Voltage on Skeletal Muscle Contraction Lab Report Pre-lab Quiz 1. Skeletal muscle fibers are innervated (stimulated) by c. motor neurons. 2. A single action potential propagating down a motor axon results in d. a single action potential and a single contractile event in the muscle fibers it innervates. 3. In resting skeletal muscle, calcium is stored in c. the sarcoplasmic reticulum. 4.
