the Bush country of Tanzania. Our self-contained VW camper gave us the freedom to camp along the streets of any city or village or along the track where Native Africans were living much as they have for many hundreds of years. Please be prepared, watching people and so-called wild animals can take many hours and, in some instances, the supply of daylight runs out. Frequently camp was made along the track out in the Bush and was visited by elephants during the night or a pride of lions stopping by to sharpen their claws on our tires. In one instance several elephants stripped branches off a tree under which we were camped not one of them touched the camper!

Haynes disassembles every subject vehicle and documents every step with thorough instructions and clear photos. Haynes repair manuals are used by the pros, but written for the do-it-yourselfer.

The VW Beetle is one of the best-loved of all classic cars, with many thousands preserved across the world, many in regular use. Over the years countless changes were introduced, together making a mid sixties Beetle, for instance, very different from one built in the mid-50s, or mid-70s, despite the obvious similarities. With the aid of hundreds of full colour photographs this new edition in paperback documents all the Beetle's specification changes and model differences during the classic period 1949-67, making it possible to determine the original specification and fittings of any Beetle from this period. Uses the same format as for the highly successful VW Transporter spec guides. Aimed at early-Beetle owners and enthusiasts. Superbly illustrated with 300 colour photographs. New edition in paperback for 2018.

Using the trusted Haynes practical approach, this all-colour manual follows the restoration of a 1971 Panel van and a 1979 Devon camper from beginning to end. Featuring hundreds of photographs and helpful diagrams where necessary, this is the only guide to restoring (or part-restoring) a "Bay" you will ever need.
